Evaluation Functions and Decision Conditions of Three-way
Decisions with Game-theoretic Rough Sets

Nouman Azam, Yan Zhang, JingTao Yao

PII: S0377-2217(17)30003-6
DOI: [10.1016/j.ejor.2016.12.048](https://doi.org/10.1016/j.ejor.2016.12.048)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We consider rough set based three-way decisions with multiple evaluation functions.
- We deal with two issues in three-way decisions.
- Differences in the evaluations and setting up decision conditions.
- We employ the game-theoretic rough sets to address these two issues.
