Multi-Objective Branch and Bound

Anthony Przybylski, Xavier Gandibleux

PII: S0377-2217(17)30067-X  
DOI: [10.1016/j.ejor.2017.01.032](https://doi.org/10.1016/j.ejor.2017.01.032)  
Reference: EOR 14213

To appear in: *European Journal of Operational Research*

Received date: 2 September 2015  
Revised date: 18 January 2017  
Accepted date: 19 January 2017

Please cite this article as: Anthony Przybylski, Xavier Gandibleux, Multi-Objective Branch and Bound, *European Journal of Operational Research* (2017), doi: [10.1016/j.ejor.2017.01.032](https://doi.org/10.1016/j.ejor.2017.01.032)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- We propose a survey about multi-objective branch and bound algorithm
- The extension of branch and bound components to the multi-objective case is presented
- A particular attention is given to bound sets
- Branch and bound algorithms from the literature are described
