This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Behavioural issues in nuclear emergency management in the past 25 years
- Behavioural issues in the application of Multi-Criteria Decision Analysis
- Behavioural impacts from model-interaction and model recommendations
- Introduction of the concept of Societal System 1 and System 2 deliberation.
- A nuclear emergency decision support framework using incomplete information.
