This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Developing a model for creating master operating theatre timetables that include multiple factors.
- Smoothing of expected bed usage, taking account of variations in bed availability.
- The use of operating theatre types allowing for multiple non-nested types.
- The inclusion of surgeons' preference scoring of available operating theatre slots.
