This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We consider multicriteria decision problems with a hierarchical criteria structure.
- Criteria of higher levels are formed by groups of criteria of lower levels.
- Decision alternatives are compared using information about criteria importance.
- Criteria importance may be qualitative or quantitative.
