This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- First application of multi-stage DEA to the life insurance industry
- Productivity and efficiency analysis of European life insurance companies
- Demonstration of the importance of controlling for environmental impacts
- Environmental conditions are important drivers of efficiency
- Sample covers complete economic cycle and divergent business environments
