This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- Study transmission-constrained multi-site CHP system optimization
- Formulate the problem as a linear programming model with a special structure
- Identify the decomposable structure of the basis
- Efficient specialized procedure for handling coupling in the problem
- Numerical results justify the efficiency of the algorithm
