This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- This paper reviews more than 300 papers on scheduling problems with no-wait constraint
- It classifies problems based on shop environments, performance measures considered, and other factors
- Independently addressed problems are determined and less addressed problems are identified
- Some potential research venues are proposed
- The current paper covers the research since min 1993 to date
