

## Accepted Manuscript

A Utility-based Link Prediction Method in Social Networks

Yongli Li , Peng Luo , Zhi-ping Fan , Kun Chen , Jiaguo Liu

PII: S0377-2217(16)31075-X  
DOI: [10.1016/j.ejor.2016.12.041](https://doi.org/10.1016/j.ejor.2016.12.041)  
Reference: EOR 14172

To appear in: *European Journal of Operational Research*

Received date: 9 April 2016  
Revised date: 22 December 2016  
Accepted date: 23 December 2016

Please cite this article as: Yongli Li , Peng Luo , Zhi-ping Fan , Kun Chen , Jiaguo Liu , A Utility-based Link Prediction Method in Social Networks, *European Journal of Operational Research* (2016), doi: [10.1016/j.ejor.2016.12.041](https://doi.org/10.1016/j.ejor.2016.12.041)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

- Utility analysis is introduced to develop the link prediction method
- link formation process is divided into meeting process and decision process
- Expectation-Maximization is developed for parameter estimation
- Logistic Regression is a special case of the proposed method
