This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- This paper surveys optimization studies on outpatient appointment systems.
- A framework for strategic, tactical and operational decisions is presented.
- The literature is also evaluated based on formulation and solution methods.
- Future research challenges and opportunities are provided.
