This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- The vehicle flow formulation for the RRVRP is proposed.
- The trip decomposition is adopted to transfer the trips to arc demand.
- A two-stage heuristic involving the modified CW and local search phase is provided.
- The proposed vehicle flow formulation and heuristic perform well.
