Chance-constrained Optimization for Pension Fund Portfolios in the Presence of Default Risk

Yufei Sun, Grace Aw, Ryan Loxton, Kok Lay Teo

PII: S0377-2217(16)30439-8
DOI: [10.1016/j.ejor.2016.06.019](https://doi.org/10.1016/j.ejor.2016.06.019)
Reference: EOR 13771

To appear in: *European Journal of Operational Research*

Received date: 2 August 2014
Revised date: 24 December 2015
Accepted date: 9 June 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- New robust optimization formulation for pension fund portfolios
- A gradient-based optimization method is proposed
- Solution is guaranteed to satisfy an all-time chance constraint
