Title: Optimizing an equilibrium supply chain network design problem by an improved hybrid biogeography based optimization algorithm

Author: Guoqing Yang Yankui Liu

PII: S1568-4946(17)30276-4
DOI: <http://dx.doi.org/doi:10.1016/j.asoc.2017.05.023>
Reference: ASOC 4227

To appear in: *Applied Soft Computing*

Received date: 22-3-2016
Revised date: 11-4-2017
Accepted date: 9-5-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Optimizing an equilibrium supply chain network design problem
by an improved hybrid biogeography based optimization
algorithm
