

## Accepted Manuscript

Combined arrival-time imaging and time reversal for scatterer identification

Eyal Amitt, Dan Givoli, Eli Turkel

PII: S0045-7825(16)31067-2

DOI: <http://dx.doi.org/10.1016/j.cma.2016.08.031>

Reference: CMA 11112

To appear in: *Comput. Methods Appl. Mech. Engrg.*

Received date: 26 January 2016

Revised date: 31 August 2016

Accepted date: 31 August 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights:

- A new computational technique for scatterer identification is proposed.
- The optimization search space is much reduced compared with Time Reversal alone.
- An improved objective function is devised.
- The performance of the new method is investigated via numerical examples.
