Title: Individual Refinement of Attenuation Correction Maps for Hybrid PET/MR based on Multi-Resolution Regional Learning

Author: Kuangyu Shi Sebastian Fürst Liang Sun Mathias Lukas Nassir Navab Stefan Förster Sibylle I. Ziegler

PII: S0895-6111(16)30103-3
DOI: <http://dx.doi.org/doi:10.1016/j.compmedimag.2016.11.005>
Reference: CMIG 1481

To appear in: *Computerized Medical Imaging and Graphics*

Received date: 30-4-2016
Revised date: 9-10-2016
Accepted date: 11-11-2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Individual Refinement of Attenuation Correction Maps for Hybrid PET/MR based on Multi-Resolution Regional Learning
