

Accepted Manuscript

Toward better public health reporting using existing off the shelf approaches:
The value of medical dictionaries in automated cancer detection using plaintext
medical data

Suranga N. Kasthurirathne, Brian E. Dixon, Judy Gichoya, Huiping Xu, Yuni
Xia, Burke Mamlin, Shaun J. Grannis

PII: S1532-0464(17)30078-3
DOI: <http://dx.doi.org/10.1016/j.jbi.2017.04.008>
Reference: YJBIN 2759

To appear in: *Journal of Biomedical Informatics*

Received Date: 23 August 2016
Revised Date: 9 April 2017
Accepted Date: 10 April 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers
we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and
review of the resulting proof before it is published in its final form. Please note that during the production process
errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Toward better public health reporting using existing off the shelf approaches: The value of medical dictionaries in automated cancer detection using plaintext medical data
