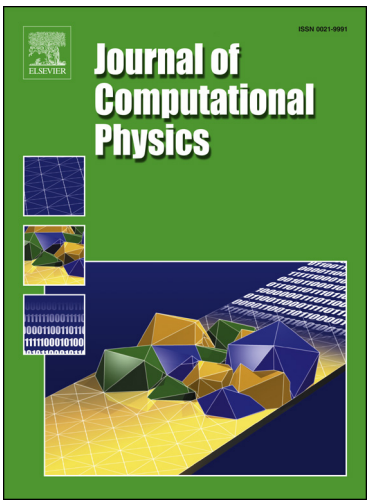
Accepted Manuscript



Data-driven reduced order models for effective yield strength and partitioning of strain in multiphase materials

Marat I. Latypov, Surya R. Kalidindi

PII: S0021-9991(17)30458-8
DOI: http://dx.doi.org/10.1016/j.jcp.2017.06.013
Reference: YJCPH 7412

To appear in: *Journal of Computational Physics*

Received date: 30 December 2016
Revised date: 12 April 2017
Accepted date: 6 June 2017

Please cite this article in press as: M.I. Latypov, S.R. Kalidindi, Data-driven reduced order models for effective yield strength and partitioning of strain in multiphase materials, *J. Comput. Phys.* (2017), http://dx.doi.org/10.1016/j.jcp.2017.06.013

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
