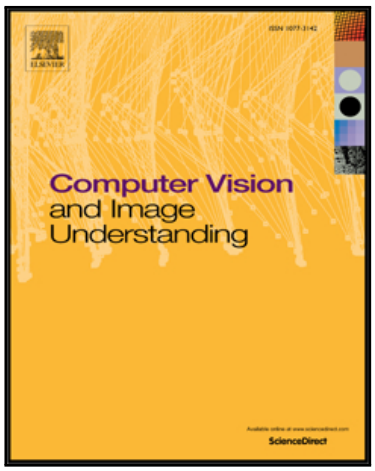
Accepted Manuscript



3D Human Pose Estimation: A Review of the Literature and Analysis of Covariates

Nikolaos Sarafianos, Bogdan Boteanu, Bogdan Ionescu, Ioannis A. Kakadiaris

PII: S1077-3142(16)30136-9
DOI: 10.1016/j.cviu.2016.09.002
Reference: YCVIU 2477

To appear in: *Computer Vision and Image Understanding*

Received date: 8 December 2015
Revised date: 2 September 2016
Accepted date: 3 September 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- Review of the recent literature in 3D human pose estimation from RGB images and videos
- Release of a challenging, publicly available, 3D pose estimation synthetic dataset
- Extensive experimental evaluation of some representative state-of-the-art methods
