Labeled dataset for integral evaluation of moving object detection algorithms: LASIESTA

Carlos Cuevas, Eva María Yáñez, Narciso García

PII: S1077-3142(16)30113-8
DOI: [10.1016/j.cviu.2016.08.005](https://doi.org/10.1016/j.cviu.2016.08.005)
Reference: YCVIU 2468

To appear in: *Computer Vision and Image Understanding*

Received date: 9 December 2015
Revised date: 18 April 2016
Accepted date: 11 August 2016

Please cite this article as: Carlos Cuevas, Eva María Yáñez, Narciso García, Labeled dataset for integral evaluation of moving object detection algorithms: LASIESTA, *Computer Vision and Image Understanding* (2016), doi: [10.1016/j.cviu.2016.08.005](https://doi.org/10.1016/j.cviu.2016.08.005)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Complete database for assessing the quality of foreground detection strategies.
- Indoor and outdoor sequences with many categories addressing different challenges.
- All the sequences are fully annotated at both pixel and object levels.
- Information concerning stationary foreground objects.
- Sequences recorded with static and moving cameras.
