This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- We propose a temporal dynamic appearance model for online multi-person tracking.
- We describe a feature selection method to capture appearance changes of persons.
- We present an incremental learning approach to learn the model online.
- We propose an online multi-person tracking method which incorporates the model.
- We conduct comprehensive experiments to demonstrate the superiority of the model.
