Rotation Invariants of Vector Fields from Orthogonal Moments

Bo Yang, Jitka Kostková, Jan Flusser, Tomáš Suk, Roxana Bujack

PII: S0031-3203(17)30354-0  
DOI: [10.1016/j.patcog.2017.09.004](https://doi.org/10.1016/j.patcog.2017.09.004)  
Reference: PR 6271

To appear in: *Pattern Recognition*

Received date: 31 March 2017  
Revised date: 2 September 2017  
Accepted date: 5 September 2017

Please cite this article as: Bo Yang, Jitka Kostková, Jan Flusser, Tomáš Suk, Roxana Bujack, Rotation Invariants of Vector Fields from Orthogonal Moments, *Pattern Recognition* (2017), doi: [10.1016/j.patcog.2017.09.004](https://doi.org/10.1016/j.patcog.2017.09.004)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- new rotation invariants of vector fields are presented
- the invariants are composed of orthogonal Gaussian-Hermite moments
- the proposed invariants are computationally more stable and more discriminative than similar invariants presented earlier
- suitable for template matching in vector fields
