This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- Proposed a novel dimensionality reduction method based on many manifold hypothesis;
- Developed a successful scheme for facial expression verification in the scrambled domain
- Successfully validate the proposed scheme in experiments
- Successfully tackled with the challenges of chaotic pattern analysis
