Fractals based Multi-Oriented Text Detection System for Recognition in Mobile Video Images

Palaiahnakote Shivakumara , Liang Wu , Tong Lu ,
Chew Lim Tan , Michael Blumenstein , Basavaraj S. Anami

PII: S0031-3203(17)30127-9
DOI: [10.1016/j.patcog.2017.03.018](https://doi.org/10.1016/j.patcog.2017.03.018)
Reference: PR 6091

To appear in: *Pattern Recognition*

Received date: 21 June 2016
Revised date: 23 January 2017
Accepted date: 11 March 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Fractal property, such as self-similarity has been explored for text detection
- Fractal expansion is explored further for detecting text candidates
- Optical flow is proposed for false positive elimination.
- Experiments are conducted on benchmark databases for evaluating method
