Learning Off-line vs. On-line Models of Interactive Multimodal Behaviors with Recurrent Neural Networks

Duc-Canh Nguyen , Gérard Bailly , Frédéric Elisei

PII: S0167-8655(17)30352-5
DOI: [10.1016/j.patrec.2017.09.033](https://doi.org/10.1016/j.patrec.2017.09.033)
Reference: PATREC 6945

To appear in: *Pattern Recognition Letters*

Received date: 18 February 2017
Revised date: 15 September 2017
Accepted date: 24 September 2017

Please cite this article as: Duc-Canh Nguyen , Gérard Bailly , Frédéric Elisei , Learning Off-line vs. On-line Models of Interactive Multimodal Behaviors with Recurrent Neural Networks, *Pattern Recognition Letters* (2017), doi: [10.1016/j.patrec.2017.09.033](https://doi.org/10.1016/j.patrec.2017.09.033)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Training behavioral models for task-oriented face-to-face interactions
- Evaluation of LSTM RNN against statistical methods
- Comparison between off-line vs. on-line predictions
- Extends experiments previously published in Pattern Recognition Letter (Mihoub et al, 2016)
