

## Accepted Manuscript

What is my rat doing? Behavior understanding of laboratory animals

Carlos Fernando Crispim-Junior, Fernando Mendes de Azevedo,  
José Marino-Neto

PII: S0167-8655(17)30143-5  
DOI: [10.1016/j.patrec.2017.05.001](https://doi.org/10.1016/j.patrec.2017.05.001)  
Reference: PATREC 6807

To appear in: *Pattern Recognition Letters*

Received date: 15 December 2016  
Revised date: 11 April 2017  
Accepted date: 1 May 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Research Highlights (Required)**

- Statistically-guided selection of inputs increase ANN performance to classify behavior
- Optimal set of hybrid (kinematic+morphologic) features are behavior-specific
- Performance of ANNs trained on control animals data are sensitive to drug treatments
-
