Adaptive Fuzzy Model for Blur Estimation on Document Images

Van Cuong Kieu, Florence Cloppet, Nicole Vincent

PII: S0167-8655(16)30370-1
DOI: [10.1016/j.patrec.2016.12.015](https://doi.org/10.1016/j.patrec.2016.12.015)
Reference: PATREC 6705

To appear in: *Pattern Recognition Letters*

Received date: 23 February 2016
Revised date: 28 November 2016
Accepted date: 20 December 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A new local approach based on a clustering of blur and non-blur classes to deal with heterogeneous blur in document images.
- Non linear approach
- A new blur feature for clustering blur and non-blur classes.
- The study on the impact of blur on OCR accuracy.
- The first comparison on standard databases.
