This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- Definition of the equivalence between assignments and edit paths
- Graph edit distance formulation as a quadratic assignment problem
- New quadratic cost function for computing graph edit distance
- Improvement of the accuracy of the approximation of graph edit distance
- Approximation computable in reasonable time
