This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

We provide a review of iris biometrics with Machine Learning techniques.

We propose a taxonomy of Machine Learning techniques for iris recognition.

We mention approaches ranging from neural networks to deep learning.

We discuss some aspects related to the mentioned methods.
