DeepIris: Learning Pairwise Filter Bank for Heterogeneous Iris Verification

Nianfeng Liu, Man Zhang, Haiqing Li, Zhenan Sun, Tieniu Tan

PII: S0167-8655(15)00327-X
DOI: [10.1016/j.patrec.2015.09.016](https://doi.org/10.1016/j.patrec.2015.09.016)
Reference: PATREC 6357

To appear in: *Pattern Recognition Letters*

Received date: 20 April 2015
Accepted date: 25 September 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- The first deep learning method for heterogeneous iris verification.
- The filter pairs are automatically learned rather than hand-crafted.
- The filter pairs are source-specific for heterogeneous iris verification.
- The EER (Equal Error Rate) of heterogeneous iris verification is reduced by 90% .
