

## Accepted Manuscript

Effects of laminar flow within a versatile microfluidic chip for in-situ electrode characterization and fuel cells

Yan Li, Willem Van Roy, Philippe M. Vereecken, Liesbet Lagae

PII: S0167-9317(17)30312-X  
DOI: doi: [10.1016/j.mee.2017.07.005](https://doi.org/10.1016/j.mee.2017.07.005)  
Reference: MEE 10622

To appear in: *Microelectronic Engineering*

Received date: 16 April 2017  
Revised date: 4 June 2017  
Accepted date: 27 July 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Effects of Laminar Flow within a Versatile Microfluidic Chip for In-situ Electrode Characterization and Fuel Cells
