Impulsive effects on the stability and stabilization of positive systems with delays

Meng-Jie Hu, Jiang-Wen Xiao, Ren-Bin Xiao, Wu-Hua Chen

PII: S0016-0032(17)30173-4
DOI: [10.1016/j.jfranklin.2017.03.019](https://doi.org/10.1016/j.jfranklin.2017.03.019)
Reference: FI 2953

To appear in: *Journal of the Franklin Institute*

Received date: 1 December 2016
Revised date: 29 March 2017
Accepted date: 31 March 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Exponential stability and positive stabilization for Impulsive positive systems (IPs) with delay are studied.
- Three types of impulses are taken into consideration.
- The Lyapunov-Razumikhin techniques are utilized for stability analysis.
