This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights:

- Low-resolution face recognition with single sample per person is firstly proposed
- Cluster-based regularization is employed to avoid overfitting and singular matrix
- Face images of five different low-resolutions are tested in this paper
