Image Encryption Method based on Chaotic Fuzzy Cellular Neural Networks

K. Ratnavelu, M. Kalpana, P. Balasubramaniam, KokSheik Wong, P. Raveendran

PII: S0165-1684(17)30163-9
DOI: [10.1016/j.sigpro.2017.05.002](https://doi.org/10.1016/j.sigpro.2017.05.002)
Reference: SIGPRO 6469

To appear in: *Signal Processing*

Received date: 28 December 2016
Revised date: 29 April 2017
Accepted date: 2 May 2017

Please cite this article as: K. Ratnavelu, M. Kalpana, P. Balasubramaniam, KokSheik Wong, P. Raveendran, Image Encryption Method based on Chaotic Fuzzy Cellular Neural Networks, *Signal Processing* (2017), doi: [10.1016/j.sigpro.2017.05.002](https://doi.org/10.1016/j.sigpro.2017.05.002)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Modifying the original FCNN for application in image encryption;
- Introducing dependency between the encryption process and the plaintext image (i.e., pixels) to defeat chosen-plaintext attack, and;
- The proposed method has a key sensitivity in the order of 10^{-10} to achieve adequate security robustness, which successfully passed the NIST SP 800-22a tests.
