Title: Efficient wastewater treatment and simultaneously electricity production using a photocatalytic fuel cell based on the radical chain reactions initiated by dual photoelectrodes

Authors: Kai Zhao, Jing Bai, Qingyi Zeng, Yan Zhang, Jinhua Li, Linsen Li, Ligang Xia, Baoxue Zhou

PII: S0304-3894(17)30340-0
DOI: <http://dx.doi.org/doi:10.1016/j.jhazmat.2017.05.004>
Reference: HAZMAT 18563

To appear in: *Journal of Hazardous Materials*

Received date: 10-2-2017
Revised date: 2-5-2017
Accepted date: 3-5-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Efficient wastewater treatment and simultaneously electricity production using a photocatalytic fuel cell based on the radical chain reactions initiated by dual photoelectrodes

Graphical Abstract

Highlights

- A radical chain reaction mechanism was introduced into a PFC system.
