Title: Rapid green synthesis of gold nanocatalyst for high-efficiency degradation of quinclorac

Authors: Guorong Shi, Yulu Li, Gaihong Xi, Qinqin Xu, Zijun He, Yating Liu, Jianhui Zhang, Jun Cai

PII: S0304-3894(17)30291-1
DOI: <http://dx.doi.org/doi:10.1016/j.jhazmat.2017.04.042>
Reference: HAZMAT 18525

To appear in: *Journal of Hazardous Materials*

Received date: 9-11-2016
Revised date: 27-3-2017
Accepted date: 16-4-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Rapid green synthesis of gold nanocatalyst for high-efficiency

degradation of quinclorac
