

## Accepted Manuscript

Title: Degradation of tetracycline by immobilized laccase and the proposed transformation pathway

Author: Dr. Jie Yang Yonghui Lin Xiaodan Yang Tzi Bun Ng  
Xiuyun Ye Dr. Juan Lin

PII: S0304-3894(16)30916-5  
DOI: <http://dx.doi.org/doi:10.1016/j.jhazmat.2016.10.019>  
Reference: HAZMAT 18100

To appear in: *Journal of Hazardous Materials*

Received date: 22-8-2016  
Revised date: 6-10-2016  
Accepted date: 10-10-2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## transformation pathway

**Highlights**

- Laccase was immobilized as magnetic cross-linked enzyme aggregates (M-CLEAs)
- Laccase at 40 U/mL eliminated over 80 µg/mL TC at pH 6 and 25 °C in 12 h
