Title: Environmental implications and applications of engineered nanoscale magnetite and its hybrid nanocomposites: A review of recent literature

Author: Chunming Su

PII: S0304-3894(16)30615-X
DOI: <http://dx.doi.org/doi:10.1016/j.jhazmat.2016.06.060>
Reference: HAZMAT 17850

To appear in: *Journal of Hazardous Materials*

Received date: 16-2-2016
Revised date: 27-6-2016
Accepted date: 30-6-2016

Please cite this article as: Chunming Su, Environmental implications and applications of engineered nanoscale magnetite and its hybrid nanocomposites: A review of recent literature, *Journal of Hazardous Materials* <http://dx.doi.org/10.1016/j.jhazmat.2016.06.060>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Environmental implications and applications of engineered nanoscale magnetite and its hybrid nanocomposites: A review of recent literature

Chunming Su*

Contents

1. Introduction
2. Synthesis of nanoscale magnetite and its hybrid nanocomposites
 - 2.1. Co-precipitation
 - 2.2. Thermal decomposition and combustion
 - 2.3. Hydrothermal synthesis
 - 2.4. Emulsion synthesis
 - 2.5. Microbial synthesis
 - 2.6. Hybrid magnetite nanocomposites
 - 2.7. Green synthesis
3. Fate, transport, and toxicity in the environment
 - 3.1. Dispersion stability
 - 3.2. Fate and transport of engineered magnetite nanoparticles
 - 3.3. Fate and transport of naturally occurring magnetite nanoparticles
 - 3.4. Toxicity assessment
4. Environmental analytical chemistry and catalysis
 - 5.1. Sensors and measurements
 - 5.2. Enzyme carrying and recycling
 - 5.3. Recyclable magnetite catalysts and magnetite-supported catalysts
 - 5.4. Activation of oxidants for organic contaminants degradation
 - 5.5. Polymerization of organic compounds
5. Air cleanup
6. Wastewater and surface water treatment
 - 6.1. Magnetic antimicrobial agents for water disinfection
 - 6.2. Modification of nanocomposite membrane and flocculation of wastewater
