

Accepted Manuscript

Title: Kinetics and mass transfer studies on the biosorption of organic matter from palm oil mill effluent by aerobic granules before and after the addition of *Serratia marcescens* SA30 in a sequencing batch reactor

Authors: Mohamad Ali Fulazzaky, Maria Nuid, Azmi Aris, Khalida Muda

PII: S0957-5820(17)30058-7
DOI: <http://dx.doi.org/doi:10.1016/j.psep.2017.02.016>
Reference: PSEP 983

To appear in: *Process Safety and Environment Protection*

Received date: 28-9-2016
Revised date: 19-1-2017
Accepted date: 20-2-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Kinetics and mass transfer studies on the biosorption of organic matter from palm oil mill effluent by aerobic granules before and after the addition of *Serratia marcescens* SA30 in a sequencing batch reactor
