Layered double hydroxides as the next generation inorganic anion exchangers: Synthetic methods versus applicability

Natalia Chubar, Robert Gilmour, Vasyl Gerda, Matej Mičušík, Maria Omastova, Katja Heister, Pascal Man, Jacques Fraissard, Vladimir Zaitsev

PII: S0001-8686(17)30063-5
DOI: doi: [10.1016/j.cis.2017.04.013](https://doi.org/10.1016/j.cis.2017.04.013)
Reference: CIS 1747

To appear in: *Advances in Colloid and Interface Science*

Please cite this article as: Natalia Chubar, Robert Gilmour, Vasyl Gerda, Matej Mičušík, Maria Omastova, Katja Heister, Pascal Man, Jacques Fraissard, Vladimir Zaitsev, Layered double hydroxides as the next generation inorganic anion exchangers: Synthetic methods versus applicability. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. *Cis*(2016), doi: [10.1016/j.cis.2017.04.013](https://doi.org/10.1016/j.cis.2017.04.013)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Layered double hydroxides as the next generation inorganic anion exchangers: Synthetic methods versus applicability
