Title: The importance of an initial aggregation step for the destabilization of an anatase colloidal suspension

Authors: Lívia Dias Campelo, Carlos Adolpho Magalhães Baltar, Silvia Cristina Alves França

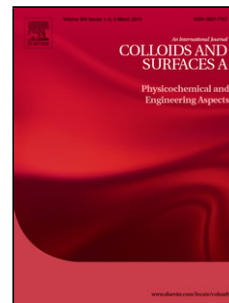

PII: S0927-7757(17)30702-1
DOI: <http://dx.doi.org/doi:10.1016/j.colsurfa.2017.07.053>
Reference: COLSUA 21827

To appear in: *Colloids and Surfaces A: Physicochem. Eng. Aspects*

Received date: 10-2-2017
Revised date: 15-7-2017
Accepted date: 15-7-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

THE IMPORTANCE OF AN INITIAL AGGREGATION STEP FOR THE DESTABILIZATION OF AN ANATASE COLLOIDAL SUSPENSION
