Title: Use of New Generation Chemicals and Nano Materials in Heavy-Oil Recovery: Visual Analysis through Micro Fluidics Experiments

Authors: J. Cui, T. Babadagli

PII: S0927-7757(17)30552-6
DOI: <http://dx.doi.org/doi:10.1016/j.colsurfa.2017.05.090>
Reference: COLSUA 21683

To appear in: *Colloids and Surfaces A: Physicochem. Eng. Aspects*

Received date: 27-3-2017
Revised date: 29-5-2017
Accepted date: 31-5-2017

Please cite this article as: J.Cui, T.Babadagli, Use of New Generation Chemicals and Nano Materials in Heavy-Oil Recovery: Visual Analysis through Micro Fluidics Experiments, *Colloids and Surfaces A: Physicochemical and Engineering Aspects*<http://dx.doi.org/10.1016/j.colsurfa.2017.05.090>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Use of New Generation Chemicals and Nano Materials in Heavy-Oil Recovery: Visual Analysis through Micro Fluidics Experiments

J. Cui
T. Babadagli¹

University of Alberta

Graphical abstract

Chemical flooding aided solvent retrieval process (oil wet, 1wt% silicon dioxide solution). MO: Mineral oil.
