

## Accepted Manuscript

Title: Performance comparison of two herbal and industrial medicines using nanoparticles with a starch/cellulose shell and alginate core for drug delivery: in vitro studies

Authors: Akbar Esmaili, Sahar Behzadi

PII: S0927-7765(17)30430-7  
DOI: <http://dx.doi.org/doi:10.1016/j.colsurfb.2017.07.018>  
Reference: COLSUB 8681

To appear in: *Colloids and Surfaces B: Biointerfaces*

Received date: 19-4-2017  
Revised date: 6-6-2017  
Accepted date: 5-7-2017

## Graphical Abstract:

Preparation nanoparticles with the shell of starch/cellulose and the core of alginate/drug nano drug carriers help to ossification by placement in porous bone. The properties of nanoparticles were studied by SEM(Scanning electron microscope) and optimization by Response Surface Methodology(RSM) .
