

Accepted Manuscript

Title: Electrospun ultrathin PBAT/nHAp fibers influenced the *in vitro* and *in vivo* osteogenesis and improved the mechanical properties of neoformed bone

Authors: Gabriela F. Santana-Melo, Bruno V.M. Rodrigues, Edmundo da Silva, Ritchelli Ricci, Fernanda R. Marciano, Thomas J. Webster, Luana M.R. Vasconcellos, Anderson O. Lobo

PII: S0927-7765(17)30237-0
DOI: <http://dx.doi.org/doi:10.1016/j.colsurfb.2017.04.053>
Reference: COLSUB 8521

To appear in: *Colloids and Surfaces B: Biointerfaces*

Received date: 16-10-2016
Revised date: 30-3-2017
Accepted date: 24-4-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Electrospun ultrathin PBAT/nHAp fibers influenced the *in vitro* and *in vivo* osteogenesis and improved the mechanical properties of neoformed bone
