The First Protection-Free Synthesis of Magnetic Bifunctional L-Proline as a Highly Active and Versatile Artificial Enzyme: Synthesis of Imidazole Derivatives

Hamideh Aghahosseini, Ali Ramazani, Katarzyna Ślepokura, Tadeusz Lis

PII: S0021-9797(17)31178-5
DOI: <https://doi.org/10.1016/j.jcis.2017.10.020>
Reference: YJCIS 22890

To appear in: *Journal of Colloid and Interface Science*

Received Date: 18 August 2017
Revised Date: 4 October 2017
Accepted Date: 5 October 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
