

## Accepted Manuscript

Facile synthesis of two clay minerals supported graphitic carbon nitride composites as highly efficient visible-light-driven photocatalysts

Zhiming Sun, Chunquan Li, Xin Du, Shuilin Zheng, Guifang Wang

PII: S0021-9797(17)31161-X  
DOI: <https://doi.org/10.1016/j.jcis.2017.10.005>  
Reference: YJCIS 22875

To appear in: *Journal of Colloid and Interface Science*

Received Date: 3 August 2017  
Revised Date: 28 September 2017  
Accepted Date: 3 October 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Facile synthesis of two clay minerals supported graphitic carbon  
nitride composites as highly efficient visible-light-driven  
photocatalysts**
