

Accepted Manuscript

Nitric oxide-sensing actuators for modulating structure in lipid-based liquid crystalline drug delivery systems

Qingtao Liu, Jinming Hu, Michael Whittaker, Thomas P Davis, Ben J Boyd

PII: S0021-9797(17)30995-5
DOI: <http://dx.doi.org/10.1016/j.jcis.2017.08.079>
Reference: YJCIS 22726

To appear in: *Journal of Colloid and Interface Science*

Received Date: 4 July 2017
Revised Date: 23 August 2017
Accepted Date: 23 August 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Nitric oxide-sensing actuators for modulating structure in lipid-based liquid crystalline drug delivery systems

Qingtao Liu, Jinming Hu, Michael Whittaker, Thomas P Davis and Ben J Boyd*

Drug Delivery, Disposition and Dynamics, and ARC Centre of Excellence in Convergent Bio-Nano
