Reduced Graphene Oxide as an Effective Adsorbent for Removal of Malachite Green dye: Plausible Adsorption Pathways

Kanika Gupta, Om P. Khatri

PII: S0021-9797(17)30435-6
DOI: <http://dx.doi.org/10.1016/j.jcis.2017.04.035>
Reference: YJCIS 22247

To appear in: *Journal of Colloid and Interface Science*

Received Date: 7 January 2017
Revised Date: 30 March 2017
Accepted Date: 10 April 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Reduced Graphene Oxide as an Effective Adsorbent for Removal of Malachite Green dye: Plausible Adsorption Pathways
