Bredol, Formation and stability of manganese-doped ZnS quantum dot monolayers determined by QCM-D and streaming potential measurements, *Journal of Colloid and Interface Science* (2017), doi: <http://dx.doi.org/10.1016/j.jcis.2017.04.059>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

# **Formation and stability of manganese-doped ZnS quantum dot monolayers determined by QCM-D and streaming potential measurements**
