The role of surface active species in the fabrication and functionality of edible solid lipid particles

Ioanna Zafeiri, Jennifer E. Norton, Paul Smith, Ian T. Norton, Fotis Spyropoulos

PII: S0021-9797(17)30356-9  
DOI: <http://dx.doi.org/10.1016/j.jcis.2017.03.085>  
Reference: YJCIS 22182

To appear in: *Journal of Colloid and Interface Science*

Received Date: 12 December 2016  
Revised Date: 17 March 2017  
Accepted Date: 20 March 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**The role of surface active species in the fabrication and  
functionality of edible solid lipid particles**
