Robust, tough and anti-fatigue cationic latexes composite hydrogels based on dual physically cross-linked network

Song Gu, Lijie Duan, Xiuyan Ren, Guang Hui Gao

PII: S0021-9797(17)30002-4
DOI: <http://dx.doi.org/10.1016/j.jcis.2017.01.002>
Reference: YJCIS 21908

To appear in: *Journal of Colloid and Interface Science*

Received Date: 29 November 2016
Revised Date: 2 January 2017
Accepted Date: 3 January 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Robust, tough and anti-fatigue cationic latexes composite hydrogels based on dual physically cross-linked network
